

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 13, lines 8-16, as follows:

A1
Physical resources **360** includes physical resources **367-371** which may be implemented as input/output devices connected to a platform, such as, for example, platform **200** via input/output adapters **248-262** in **Figure 2**, as sections of memory or memories, such as for example, one of memories **240-246** in **Figure 2**, or as sections of a storage device, such as for example, storage **270** in **Figure 2**. Physical resources ~~[[350]]~~ **360** is divided into fixed size page frames **361-371** ~~351-361~~, typically 4KB each.

Please amend the paragraph on page 13, lines 17-28, as follows:

A2
Page frame tables **320-350** each contain a table of translations of OS virtual addresses to actual physical addresses to physical resources **360**. In the depicted embodiment, each page frame table contains mappings for virtual Pages 1-8 **321-328** for OS image **302**, **331-338** for OS image **304**, **341-348** for OS image **306** and **351-358** for OS image **308**. Thus, as depicted, OS image's **302** Page 1 **321** is mapped to page frame **367** ~~[[368]]~~. Others of OS image's **302** pages 2-8 **322-328** are mapped to various others of page frames **361-371**. As depicted in **Figure 3**, there is no requirement that the pages used by the OSs **302-308** be stored consecutively in the physical resources **360**.
